

# Environmental Newsletter

## NEW FROM HANNA !

In an effort to get more and more involved in getting our products sold and used appropriately in your field, Hanna Instruments Canada has decided to start publishing an *Environmental Newsletter*.

This newsletter will be sent to you on a regular basis and its content will vary from one to the other.

Its purpose is to inform you of new products for specific environmental applications, to give you some tips and technical information, as well as share some success stories of fellow distributors in selling some of our products in existing or new applications.

Your comments, suggestions, success stories and application notes will be most welcomed and appreciated.

Whether you are involved in wastewater analysis, river profiling or groundwater testing, we want to hear from you and will be committed to keeping you informed of what we can do to better serve your needs.

**Don't forget to check out  
our Monthly Promotions at
