Cyanuric Acid and pH Meter

## Cyanuric Acid and pH Meter

In swimming pools, spas and similar applications, cyanuric acid helps to stabilize the breakdown of chlorine, especially in sunlight.

Frequent testing of both cyanuric acid and pH will help to minimize chlorine consumption.

A single instrument can now be used to measure both pH and cyanuric acid. This photometer is easy to use and saves the time and expense of setting up separate tests.

The casing has been designed to perfectly fit the palm of your hand! The HI 93724 weighs less than 300 grams and with a long battery life is ideal for on-the-spot checks.

The unit gives a low battery warning and even shuts off after 10 minutes to prolong battery life.
